

Form 5A

Elbio Fernández

2018

Image taken from: <https://blog.hypeinnovation.com/the-definition-of-innovation>

There was a man that had a bycicle. One Day the man fell off his bike.

*Instead of crying, he had an idea. He
invented the helmet! He was an innovator.*

INNOVATION

In class we discussed the meaning of innovation.
This is what we think:

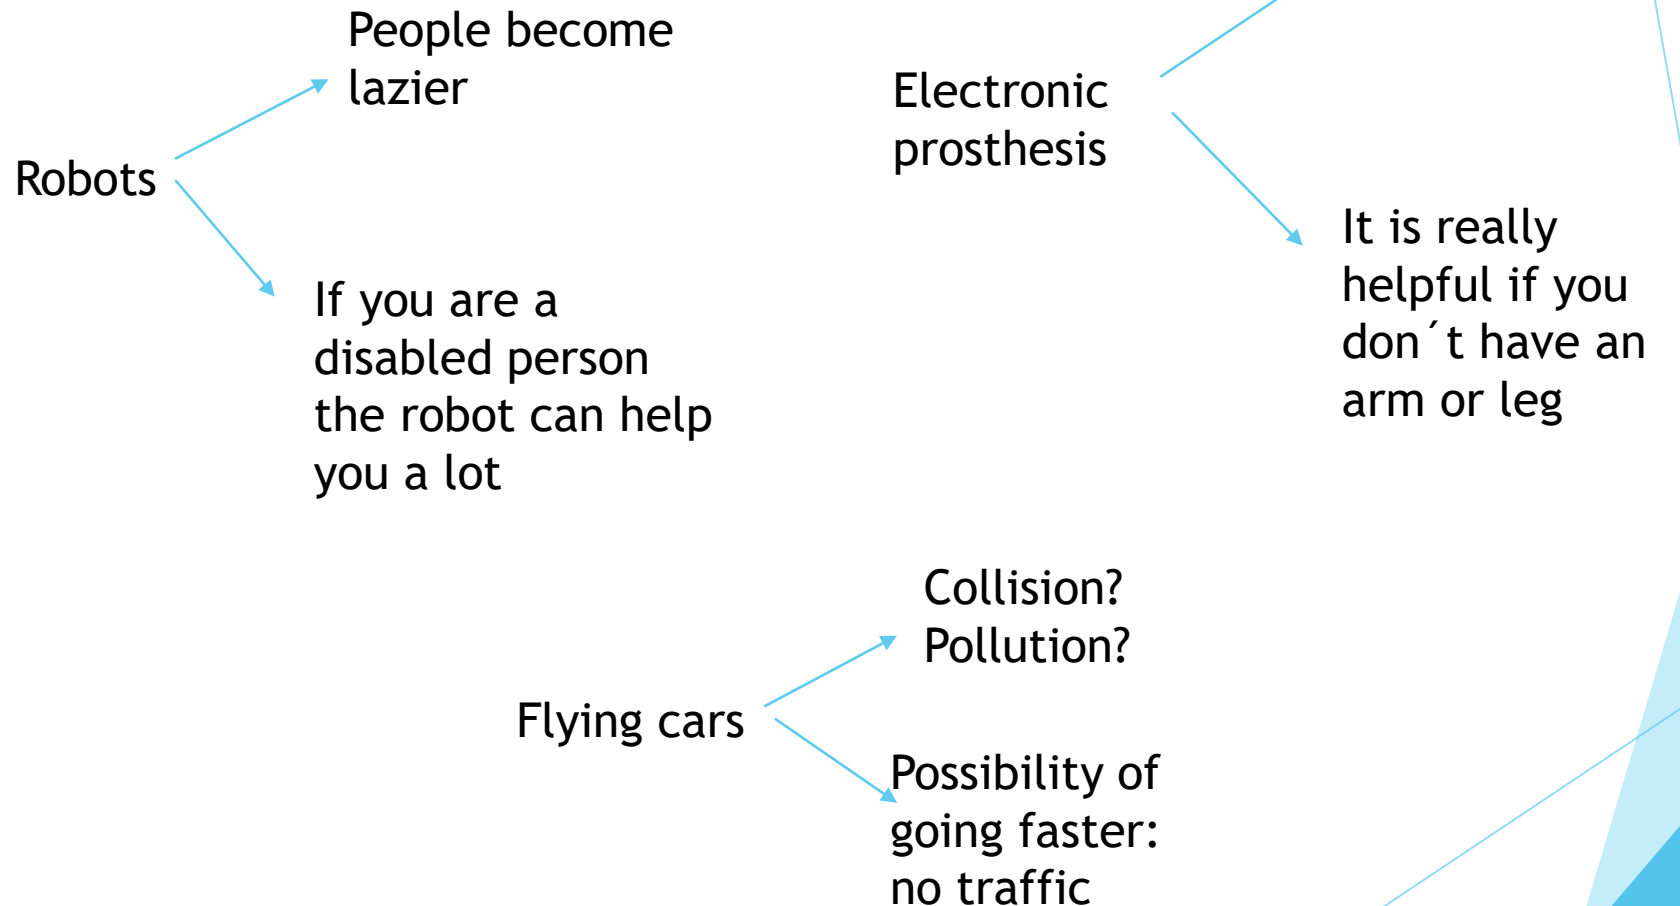

- ▶ To make something better: Nacho and Carolina
- ▶ Change things of the world: Chiara and Facundo
- ▶ Creating and doing new things: Valentina and Pilar
- ▶ Creating new things that make the world better: Juan and Nazarena.
- ▶ Something that makes you want to try it: Guzmán and Macarena
- ▶ Change things of the past in order to change the world

innovation

***According to the Oxford Dictionary,
innovation is:***

- 1) The action or process of innovating.***
- 2) A new method, idea, product, etc.***

Two students realized that innovation is good for humans but not always good for the world. Innovations have **benefits** and **side effects**. For example:

Innovations at school

In the recent years our
school changed a lot...

Here are some of the innovations in our school

Interactive screen

It is a tactile screen that is used for different activities and for watching videos

Laptops:

From this year on, each Form 5 and Form 6 student has one laptop to work with at school.

We have the laptops in the classroom and we use them almost everyday.

We also have computer labs.

We also have one computer per class.

We use the computer to look for information about our projects and to do different activities.

3D PRINTER!

WHAT IS A 3D PRINTER?

“3D Printing is an additive manufacturing process that creates a physical object from a digital design”.

From:

<https://www.3dhubs.com/what-is-3d-printing>

WHY DO WE HAVE IT?

Last year, students from 6th grade saved money in order to buy an innovative gift for the school!

We are still discovering its uses!

Lift truck

It is used for transporting lunch boxes

Air Conditioner

It is used for ventilation

Our School in 2030

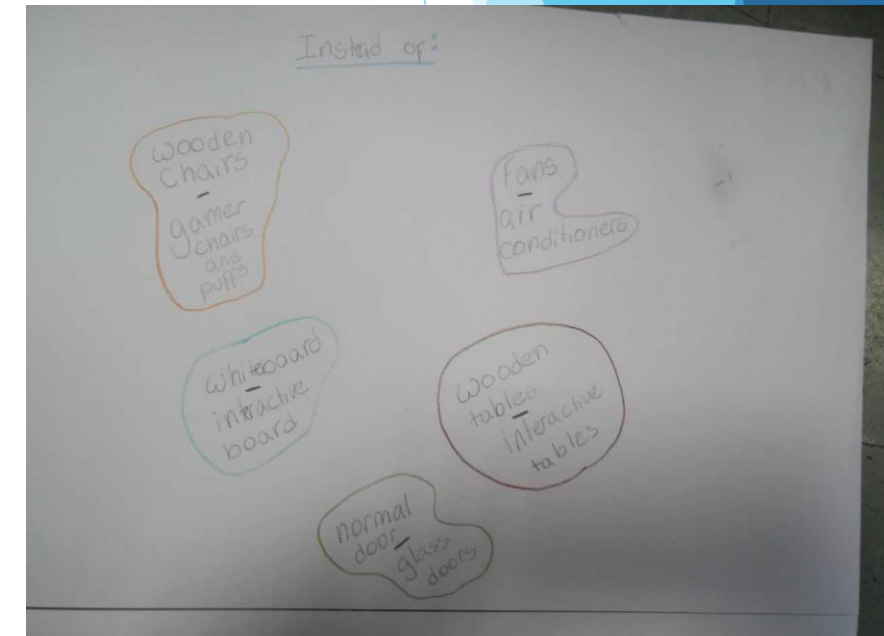

We imagined how our school and
country will be in 2030

These are our ideas

Instead of:

- Wooden chairs / gamer chairs
- Fans / air conditioners
- Wooden tables / interactive tables
- White boards / Interactive boards

Nazarena
Pilar
Facundo
Macarena
Guzmán
Agustina
Chiara
Tiago
Carolina
Agustín
Juani
Matías
Aldina
Valentina
Sofía
Mateo
Joaquín
Juan
Nacho
Julieta
Lara
valentina
